

## Internet Service in the Philippines

Since many American and Canadian companies use, or want to use, Filipino agents, we have prepared this information.

It is a long way from the Philippines to the USA and Canada, but EVS' dialing products will work from the Philippines **IF** the agents have very good internet service. (Inferior internet service will result in poor quality and/or dropped calls.)

We strongly recommend each user in the Philippines has a free trial before buying our dialers.

These are the 2 internet service providers that we have determined to be the best in the Philippines:

- 1) PLDT – This is the largest, has the best coverage, has optic fiber, and is dependable. (It does not have static IP but the IP does not change often.)
- 2) Globe – Has high speed, offers up to 1 Gb service, but is expensive. Static IP is available for an extra \$14 per month.
